30 DAY RISK FREE TRIAL

Try IronPorts award-winning spam filter for 30 days risk free.

Cisco has thousands of customers around the world, who realized after a short trial that IronPort technology is the most advanced security offering available today. In fact, 95 percent of users that evaluate IronPort solutions become happy customers.

With Cisco's "Try Before You Buy" program, your school district can receive a virtual evaluation and/or a fully-functional Cisco IronPort appliance to test, free for 30 days.

A school's delicate technology environment requires the highest levels of control to ensure that students, teachers and staff have access to the information they need without threat of information that may be inappropriate or dangerous to the learning environment.

IronPort's solution acts as a "gateway" to all email communications entering and exiting the network by filtering the content between the firewall and groupware servers. The highly customizable controls of the IronPort devices provide "comprehensive security and unprecedented visibility into email traffic."

"Key features of a comprehensive email security solution include:

- High performance MTA platform, ensuring that email infrastructure is never overwhelmed
- Protection of email within compliance regulations, leveraging customizable content scanning and filtering for policy enforcement
- Powerful and consistent anti-spam technology, using advanced reputation filters to block unwanted messages
- Proactive virus protection, capable of preventing any major infections
- Mail flow monitoring and reporting, yielding a complete real-time view of all mail flowing through the email infrastructure
- Centralized management, allowing configurability and administration of multiple appliances from a single location"
