

NETWORK SYSTEMS SECURITY ALARM/ SURVEILLANCE SYSTEM

DESCRIPTION:

Video surveillance systems deter theft and vandalism twenty-four hours a day.

Systems increase your chance of catching and prosecuting individuals involved in crimes.

In the event of a violation, investigators can retrieve images to better prosecute criminals and secure specific areas, preventing future criminal acts.

NIC professionals will design and install a system tailored to your organization.

We strategically place equipment to provide safe environments internally and externally.

Surveillance cameras capture suspicious activity alerting individuals and security personnel to possible acts of violence. The knowledge that surveillance cameras are in place provides peace of mind to employees and clients regardless of where they are on property.

Besides discouraging crime, studies show surveillance cameras have a positive correlation on employee productivity. Many employers use the system as a tool to monitor employee performance.

Twenty-four hour surveillance archives all activity that occurs on property. Images can be archived on a hard drive or CD's to reduce costs. Either way provides for quick accessibility and better cataloging

Video surveillance systems are web enabled allowing you to monitor your business anytime, anywhere. This is especially beneficial if called upon to review an incident.

Call NIC for a total solution. We are a single source for all of your technology requirements. Services include consulting, design, project management, system installation, maintenance, and support for all network systems.

SERVICES:

Design and Coordination Services

Site surveys and assessment

Security auditing

Complete security planning

Technical project management

Phased implementations

Security Surveillance Systems

Analog and digital video surveillance systems

Efficient video storage and cataloging

Pan-tilt units and controls

Biometric-Iris recognition

Network enabled for remote monitoring

Vandal proof housings

Ready to go bundles

Building Security Systems

Keypad and card access control

Intrusion detection

Door contacts and motion detectors

Internet enabled for remote administration

Detailed reporting

Support Services

Complete security training

Remote and on-site support services

Adds, moves and changes

Proactive maintenance program

Spare parts and technical support
