Network Infrastructure Corporation (NIC) first in earning Cisco's Express Foundation Specialization.

Tempe, Ariz. – June 28, 2006 – Network Infrastructure Corporation (NIC), a single-source provider of voice, video and data integration services, is the first Cisco Gold Partner to earn the new Express Foundation Specialization and is one of three Cisco partners nationwide with the specialization.

The Express Foundation specialization is part of Cisco's new Advanced Partnership program that is raising the bar in terms of education, competence and customer satisfaction. Express Foundation focuses on IP convergence including IP Telephony (VoIP), Advanced Security and Advanced Wireless solutions. The specialization was a natural fit to NIC's business model and motto, "The Only Solution is a Total Solution."

Network Infrastructure Corporation was founded in 1994 with current annual sales exceeding \$25 million. NIC provides a "Total Solution" approach to network technology planning and implementation. The company has offices in Arizona and California and serves customers throughout the United States. NIC provides consulting, implementation and support services for converged IP solutions inclusive of, wireless, data, voice, video and security for education; state and local governments; hospitality and gaming; and commercial businesses. As a CISCO Gold Partner, NIC has the highest technology credentials available in the industry.
