**Network Infrastructure Corporation Achieves
Cisco SMB Select Partner Status in the US**

Tempe, Ariz. – Dec. 2006 –Network Infrastructure Corporation announced today that it has achieved the small and medium-sized business (SMB) Select Partner designation from Cisco Systems®. This recognition is awarded by Cisco to organizations that meet specific program criteria that is focused on business practice Integrations in the small and medium-sized business (SMB) marketplace (companies that have between 20-250 employees).

Network Infrastructure Corporation has met the rigorous Cisco certified personnel levels that are required of an SMB Select Partner to ensure that sales and support organizations are properly staffed and are capable of selling, designing, installing, and supporting products for the SMB marketplace. Network Infrastructure Corporation is a dedicated local company that understands how to design and deliver a secure, reliable network infrastructure. As Cisco's go-to-market channel in the SMB segment, Network Infrastructure Corporation understands what drives and challenges companies with fewer than 250 employees.

This outstanding accomplishment for Network Infrastructure Corporation demonstrates its desire to develop expertise in complex networking technologies. Network Infrastructure Corporation is a valued member of Cisco's channel partner program. This new designation sets Network Infrastructure Corporation apart from other vendors who may not fully understand the business concerns of companies in the SMB marketplace. Cisco provides Network Infrastructure Corporation with the training, support, and resources necessary to provide the highest quality of service available to their SMB customers. For more information about Network Infrastructure Corporation please visit www.nicweb.com or call 480.850.5050.

Network Infrastructure Corporation was founded in 1994 with current annual sales exceeding \$25 million. NIC provides a "Total Solution" approach to network technology planning and implementation. The company has offices in Arizona and California and serves customers throughout the United States.
