Network Infrastructure Corporation (NIC) awarded Wireless contract from ADOA Spirit.

Tempe, Ariz. – Nov 3, 2008 – Network Infrastructure Corporation (NIC), a single-source provider of voice, video and data integration services, has been awarded the Digital Microwave Radio Equipment contract through the Arizona state procurement vehicle, *SPIRIT*.

The contract will enable NIC customers to purchase licensed and unlicensed point-to-point and point-to-multipoint wireless backhaul systems through NIC using State procurement contract rates. “This contract award opens a much needed path for our customers to get the wireless network they have been waiting for while still purchasing from approved contract vehicles. This is a great thing for our Education and Government clients” – Brent Graves, NIC Account Manager.

NIC has installed over 700 wireless radios throughout Arizona primarily with education and local government clients. Some of NIC’s largest deployments have provided economical, efficient connections for City of Avondale, Northwest Fire District, City of Tempe and, the most recent and largest being the implementation of a Ceragon point-to-point network for the Paradise Valley Unified School District. NIC’s technical staff maintains the highest certifications in the industry and is skilled in all physical and technical elements of a deployment, including installation of up to 200 ft wireless towers.

Network Infrastructure Corporation was founded in 1994 with current annual sales exceeding \$25 million. NIC provides a “Total Solution” approach to network technology planning and implementation. The company has offices in Tempe and Tucson, Arizona and serves customers throughout the United States. NIC provides consulting, implementation and support services for converged IP solutions inclusive of, wireless, data, voice, video and security for education; state and local governments; hospitality and gaming; and commercial businesses. Committed to providing our customers the best, NIC has the highest technology credentials available in the industry.
